

## Job Description: Software Engineer

### OVERVIEW

The House-on-the-Hill Software Development Team is looking to expand its capability to deliver high quality features to the business as part of its substantial growth trajectory. We are seeking a team worker and contributor with the relevant skills and ideas to help us grow further. The team is based out of Manchester, UK.

### REQUIREMENTS

- A degree in Computer Science, Software Engineering, IT or a related field.
- Strong skills in C/C++/Win32 API & Visual Studio (4-5 years minimum)
- C# ASP.Net
- JavaScript, CSS, JQuery
- SQL query analysis and optimisation (MS SQL, MySQL)
- IIS
- Azure cloud platform
- Full stack development
- Demonstrated ability to absorb new technologies and learn new platforms
- Ability to work in UK and attendance as need arises in the House-on-the-Hill office
- It is expected this role will be largely remote, candidate will have to be able to operate effectively and independently

### DESIRABLE SKILLS

- Office 365 MS Graph
- ASP.Net Web API
- Mobile development
- JavaScript client frameworks
- Experience with continuous integration

### BONUS SKILLS

- Containers
- IT Service Management Software
- CRM

### Benefits:

- Work from home opportunities
- Pension
